

I think the big radio stations have made their share of profits from the public. If we, the public wish to subscribe to XM Stereo then that is our prerogative. For them to tell us what we can have on our stereo is ridiculous. We live in a very congested area. I personally love to have up to date information. In the winter and summer when storms are approaching, I like to know I am safe. Fair to say where I stand. I think that XM should be allowed to continue the great service they have been providing all of us.

Regards,

Hannah Hoover
